-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a dispenser system for a liquid crystal display panel, classified in class 349, subclass 153.
- II. Claims 13-22, drawn to a dispensing method for a liquid crystal display panel, classified in class 349, subclass 187.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case (1), the dispensing method may be performed manually without the inclusion of the apparatus. That is, the apparatus is not necessary to perform the claimed method.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2871

This application contains the following patentably distinct species of the claimed invention:

Species A, an embodiment, the specifics of which include the manufacturing of a single substrate at a time.

Sub-Species A₁, the specifics of which relate to filling with liquid crystal via a dropping method.

Sub-Species A₂, the specifics of which relate to filling with liquid crystal via a vacuum method

Species B, another embodiment, the specifics of which include the manufacturing of more than one substrate of a same size.

Sub-Species B₁, the specifics of which relate to filling with liquid crystal via a dropping method.

Sub-Species B₂, the specifics of which relate to filling with liquid crystal via a vacuum method.

Species C, another embodiment, the specifics of which include the manufacturing of a plurality of substrates of different sizes.

Sub-Species C₁, the specifics of which relate to filling with liquid crystal via a dropping method.

Sub-Species C₂, the specifics of which relate to filling with liquid crystal via a vacuum method.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed invention (Group I or II), species (A, B, or C) and sub-species (relating to the elected species) of the elected invention for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
